

## **PPS moves into Europe**

PPS has been retained by Kingfisher plc to manage the roll-out of its global sourcing system for its European Operating Companies.

The in-house developed system records and monitors all the supply chain steps of a product sourced and manufactured outside of the UK. It includes the innovation and design phases, sampling and QC stages as well as the traditional milestones managed from purchase order creation to arrival European Distribution Centre.

The "cradle to grave" system was successfully implemented in B&Q two years ago.
